TITAN-SV MPV3

Highly Portable, Multi-Mission UAS Detection System Featuring Long-Range Detection

TITAN-SV MPV3 Features

- Next-Generation of our proven 100% Passive RF Sensor technology
- Highly Portable long-range detection and identification of 30+ discrete UAS signatures
- Single configuration for man portable, vehicle mounted or static mounted operations
- Extensive RF Signature Library with robust support for precision telemetry extraction
- Operator Interface includes audible UAS detection alerts via built in audio-out, visual detection alerts via LED status indicator, and fully featured web-based UI for remote monitoring using standard browser technology
- Rugged IP-rated protection for Power, Network, Audio, and USB I/O

Network-Based TITAN-SV Sensor Monitoring

- Fully Automated UI that provides visual/audible alerting and tracking of sUAS
- TITAN-SV WebUI works with most modern web browsers with minimal configuration (MS Edge, Firefox, Chrome)

Precision Tracking (TITAN-SV-MPV3)

Browser-Based HMI for maximum flexibility

SWaP Characteristics

- Wide Voltage Support (10VDC-30VDC)
- Dimensions: 6.5" x 8" x 3.125"
- Weight: 4.7 lb (Sensor Only)
- Power/Battery (Thales 148, BB2590U), 110AC Shore Power, 12VDC Vehicle
